

Transition tasks

- These tasks are designed to take you further than the specification
- They give you additional content to bring into your synoptic essay on paper 3- which AQA specify must contain evidence of wider reading for the highest grades PLUS they are excellent preparation for a degree/ career in the sciences

Task	Tick when complete
Complete the learning task on Covid 19 to learn about virus's and how they can be treated.	
Complete the kerboodle transition sheet.	
Write an article on what heart attacks are, the risk factors and what happens to the heart during one. https://www.youtube.com/watch?v=3_PYnWVoUzM	
Research the career of epidemiology- how does this field contribute to health care?	
Watch this documentary on Cystic Fibrosis, and make notes https://www.youtube.com/watch?v=r6GJLT3TYMO	
Evaluate the claims made in this article about cholesterol http://www.telegraph.co.uk/science/2016/06/12/high-cholesterol-does-not-cause-heart-disease-new-research-finds/	

After this if you get bored there is another sheet called bridging tasks that can be done as an extension sheet.
